

Capability Statement

About Us

LED Plant & Civil delivers reliable civil works, earthworks, underground services and plant hire solutions for developers and principal contractors across Southeast Queensland.

From early works through to handover, we combine experienced people, modern plant, and proven construction methodologies to deliver safe, compliant, and on-program outcomes. Our team is trusted to perform in live environments, work collaboratively with site management, and maintain consistent quality across all stages of delivery.

What We Do:

- **Civil works & earthworks:** Bulk earthworks, site preparation, trimming and GPS-controlled detailed excavation
- **Underground services:** Trenching, conduits, pits, drainage, kerb and channel, and reinstatement
- **Plant hire:** Wet and dry hire of excavators, posi-tracks, moxis and supporting equipment

Our Experience

LED Plant & Civil has extensive experience supporting major principal contractors across a broad range of civil infrastructure and land development projects. Our teams work confidently in live construction environments, integrating effectively with site management, engineers, consultants, and other trades to deliver scopes that meet program, quality, and safety requirements.

Our capability is underpinned by experienced operational leadership, including **Director / Operations Manager Nick Murphy** and **Superintendent John Finnegan**, who collectively bring decades of hands-on civil construction, project delivery, and team leadership experience on principal-led projects.

Nick is recognised for his disciplined, outcomes-focused approach to planning and execution, ensuring works are delivered efficiently with clear communication, high accountability, and minimal interface risk. John provides strong on-site leadership, with a proven ability to manage complex and high-risk works safely, methodically and in full accordance with project specifications and site controls.

Why Choose LED Plant & Civil

- Experienced pipelaying and excavation specialists
- Modern, reliable and well-maintained plant and equipment
- Safety-first culture and continuous improvement focus
- Flexible service model that adapts to client needs
- Dedicated Operations Management team (Operations Manager and Superintendent) with 40+ years' combined civil and earthmoving experience, including 35+ years leading projects and teams
- Professional corporate leadership applying the Integrated Management System across the business and driving consistent improvement and operational excellence

Core Capabilities: Pipelaying

LED Plant & Civil delivers technically precise installation of stormwater, sewer, and water-main infrastructure across civil and land development projects. Works include compliant trenching, pipe embedment, pit construction and alignment control for PVC, PE and concrete pipe systems.

Our crews apply disciplined excavation practices, industry approved installation methodologies, and rigorous testing and quality assurance processes to ensure all systems are constructed to specification and design intent.

This structured and controlled approach delivers reliable, long-term asset performance, minimises rework risk and supports safe, compliant delivery within live construction environments.

Core Capabilities: Detailed Excavation

LED Plant & Civil provides high-accuracy detailed excavation for civil and underground infrastructure works, achieving precise grades, trench profiles and structural excavation tolerances.

Our operators utilise advanced Topcon, Kommand and Trimble Earthworks GPS systems, integrating digital design models with disciplined earthmoving and material management methodologies to maintain accuracy and compliance throughout execution.

This approach ensures consistent, industry-standard outcomes, supports efficient sequencing with other trades and reduces interface and rework risk on complex sites.

Core Capabilities:

Custom Drainage Solutions

LED Plant & Civil delivers custom drainage solutions including engineered slabs, box culverts, bespoke headwalls and large-scale stormwater pits for complex civil projects.

Works are carried out through accurate bulk and detailed excavation, compliant formwork, reinforced concrete construction and precise placement of pre-cast elements, aligned with hydraulic and structural design requirements.

Our methodical construction approach ensures durable, compliant drainage infrastructure capable of meeting long-term hydraulic performance requirements and principal contractor quality standards.

Core Capabilities:

Plant Hire Wet & Dry

LED Plant & Civil provides modern, fully maintained plant supported by experienced operators, delivering reliable wet and dry hire solutions that ensure efficient and high-performance outcomes on any civil project.

Current Equipment

Komatsu PC88MR-11 – 8-ton excavator

2 x Komatsu PC290 – 29-ton excavator

Volvo ECR145EL – 14-ton reduced-radius excavator

CAT 330 GC – 30-ton excavator

Kobelco SK235SR-2 WB – 23-ton short-radius excavator

Komatsu PC360 – 36-ton excavator

Volvo EC250 – 25-ton excavator

Kobelco SK380XD – 38-ton excavator

Volvo 26t Excavator – 26-ton excavator

Kobelco SK380XDLC-10 – 38-ton excavator

JCB Loader – Articulated loader

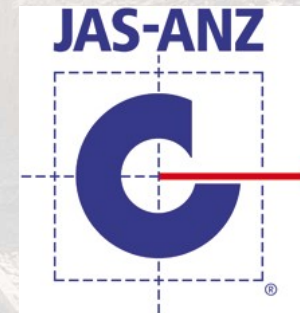

Bobcat T590 – Compact track loader

Moxi HM300 – 30-ton articulated dump truck

Quality
Safety
&
Environment

LED Plant & Civil operates under a fully certified Integrated Management System aligned with industry best practices and ISO standards.

We hold JAS-ANZ accredited certification to **ISO 45001 (Safety)**, **ISO 9001 (Quality)**, and **ISO 14001 (Environmental Management)**, reinforcing our commitment to delivering safe, high-quality, and environmentally responsible outcomes across all projects.

4 Pillars Of Success

Quality Workmanship & Technical Excellence

Quality workmanship is delivered through skilled personnel, modern equipment, and precise construction methodologies, ensuring consistent, technically sound outcomes delivered right the first time.

Safety Without Compromise

Safety is embedded in everything we do. Investment in safer equipment, disciplined site controls and continual system improvement underpins our commitment to delivering work without compromise.

Accountability and Trust

LED builds accountability and trust through transparent communication, clear expectations, and reliable reporting, supporting strong working relationships with principal contractors and project stakeholders.

Continuous Improvement & Growth

Ongoing improvement is driven by sustained investment in people, processes and systems, reinforced by our Integrated Management System and commitment to raising organisational standards.
